

**INTELLIGENT
PHARMA**

Developing solutions. Discovering drugs.

JOB OFFER - COMPUTATIONAL CHEMIST

Intelligent Pharma is a biotechnology company dedicated to developing computational technologies for drug discovery, and providing services based on these technologies to pharmaceutical companies, biotech companies and research institutes. Our mission is to be the preferred provider of computational chemistry services and life science informatics and to continue to deliver cutting edge technologies to the scientific community.

Intelligent Pharma is currently seeking for a

COMPUTATIONAL CHEMIST

Job Description:

- You will work in the context of a state-of-the-art European project with partners all over Europe studying protein design
- You will be part of a multicultural team composed out of computer engineers, product developers and computational chemists
- You will develop novel algorithms and establish collaborations with external partners for validation
- You will be working on client projects for the Pharma industry
- Location: Headquarters, Barcelona

We seek for:

- Experience with protein and antibody theoretical design
- Programming skills
- High level of English
- PhD is a plus

Apply before the 25th of October at rrhh@intelligentpharma.com.
